INTERESTS

- **Sailing** (Specifically J80 sailboats and Hobiecats)
- **Swimming**
- **Hiking**
- **Socializing**
- **Computer Games** (Mostly strategy games)
- **Music** (Love listening to live music, especially orchestras)

MIKKEL THERS NIELSEN

Profile

I recently finished my bachelors in Artificial Intelligence and Data at DTU, about to start my Master's in Human-Centered Artificial Intelligence.

During my studies at DTU, I have learned various methods for analyzing and interpreting data. I have worked through the process of gathering raw data and turning it into usable, interpretable outputs. Here are some of the areas my studies have focused on as well as interest me a lot and that I now understand well:

- Machine learning
 - Deep learning (multilayer neural networks)
 - Supervised learning
 - Unsupervised learning
 - Reinforcement Learning
 - Statistics
 - Introductory SQL
- Electrical engineering (1st year completed)
 - Mathematics
 - Discrete mathematics
 - Algorithms and data structures (common algorithms + use cases)
 - UX design (application user experience)

Other than the knowledge I've gained from my studies, I would also describe myself as a people person. I've spent time organizing the DTU study start, where we held events over multiple days for close to 100 people. I've also spent half a year at a Højskole in Sønderborg, Denmark. That is where my interest in sailing began, and it has since become a favorite hobby of mine. Working as a shift manager at McDonald's has also given me valuable experience in how people react in different situations.

 WORK EXPERIENCE

Jun 2017 - Jun 2021 **Shift Leader**
[McDonald's, Slagelse/Korsør](#)

I worked at McDonald's for four years. I started as a crew member, and later I was promoted to the position of trainer, where I was responsible for training new crew members. A year later, I was promoted again to the position of Shift Leader, where my role involved overseeing operations and handling more administrative tasks. During my time there, I gained a lot of experience navigating stressful situations, communicating with many different people, and adapting to whatever the moment required.

 EDUCATION AND QUALIFICATIONS

Sept 2026 - Jun 2028 **Master of Science in Human-Centered AI**
[Danmarks Tekniske Universitet \(DTU\), Lyngby](#)

Starting September 2026, with a focus on large-scale data analysis and AI/machine learning.

Sept 2022 - Jun 2026 **Bachelor of Artificial Intelligence and Data**
[Danmarks Tekniske Universitet \(DTU\), Lyngby](#)

Completed my Bachelor's degree, including a thesis on news recommendation – predicting what a given user would want to read based on their history and a target set by the news outlet. I implemented and evaluated several models using a post-processing layer, avoiding the need to retrain entire models.

 SKILLS

Python	★★★★★	Maple	★★★★☆
LaTeX	★★★★★	Excel	★★★★☆
PyCharm	★★★★☆	Canvas	★★★★☆
VS Code	★★★★★	SQL	★★★★☆
C/C++	★★★★☆	Rust	★★★★☆
RStudio	★★★★☆
